

Bringing Marine Nature Back to Our Lives - the Role of Science

Velmu conference 2023

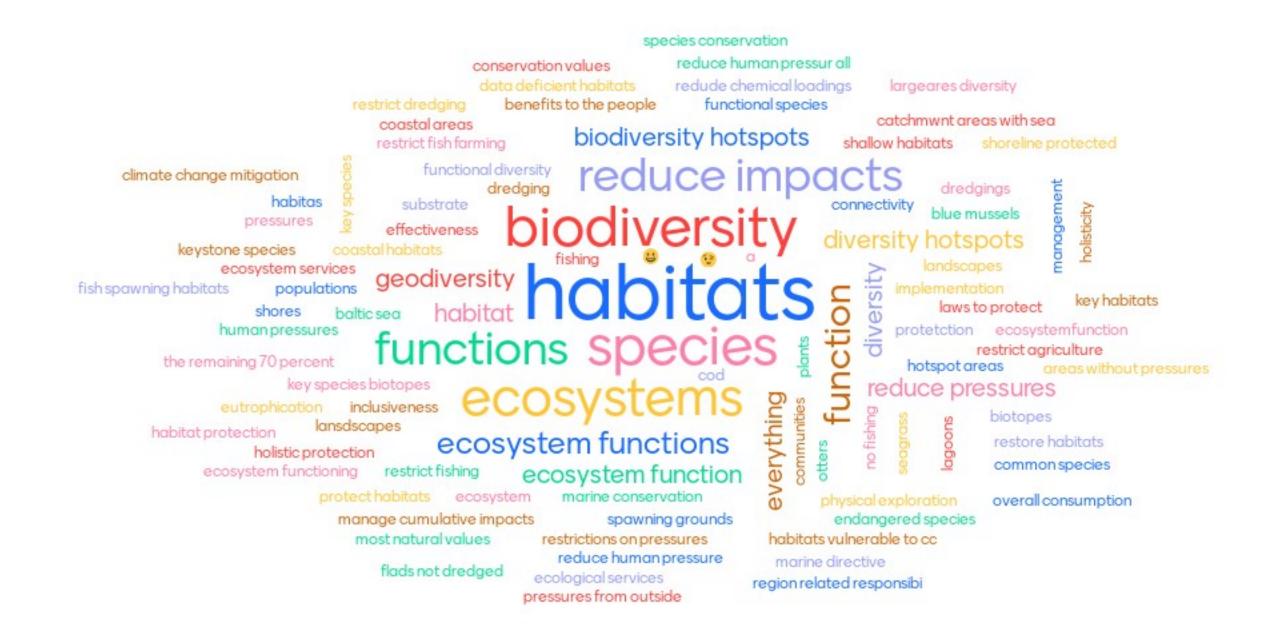

Answer to the Ultimate Question of Life, the Universe, and Everything

30 by 30: Top 3 most important aspects of marine conservation, what should be protected? (species, habitats, types of pressures to be restricted)

10 % strict: In your area, what should be banned in MPAs to achieve strict protection?

Marine conservation:

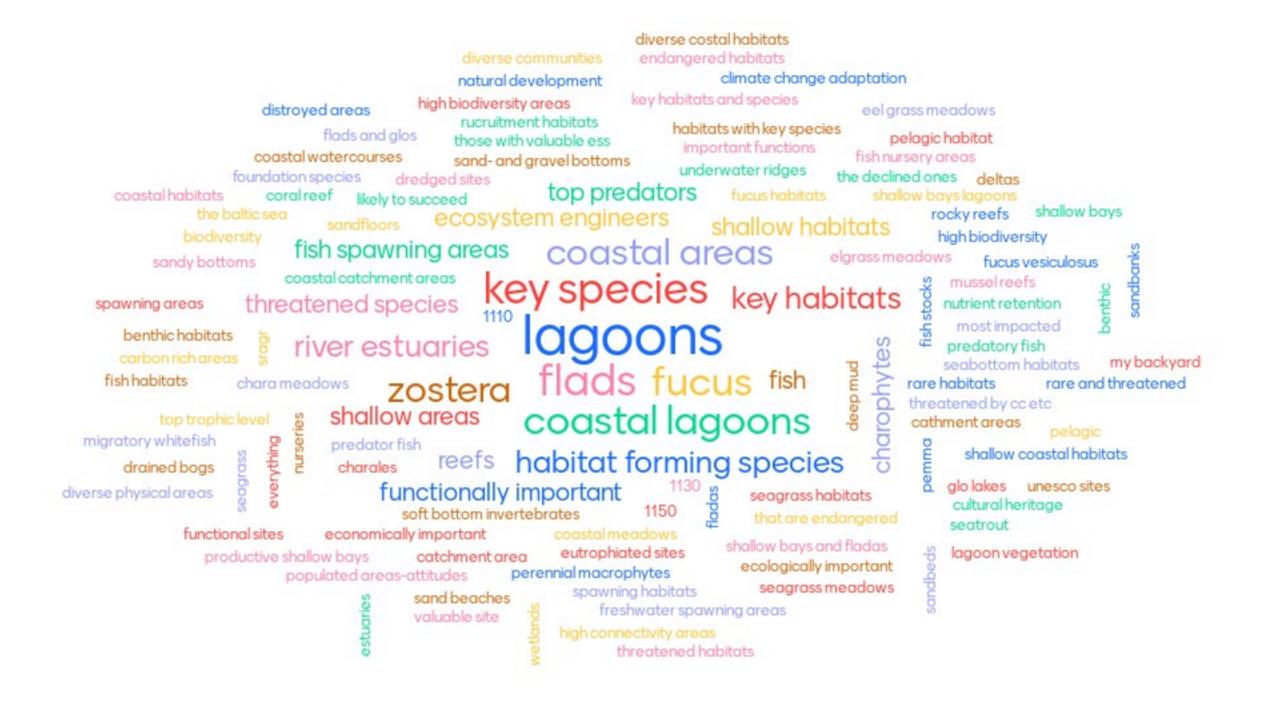

Let's establish new MPAs for 50 years, evaluate them again, and change location if not effective enough.

Let's evaluate all MPAs at fixed intervals and make required changes.

Let's leave the MPAs as they are even if their protection value has decreased significantly.

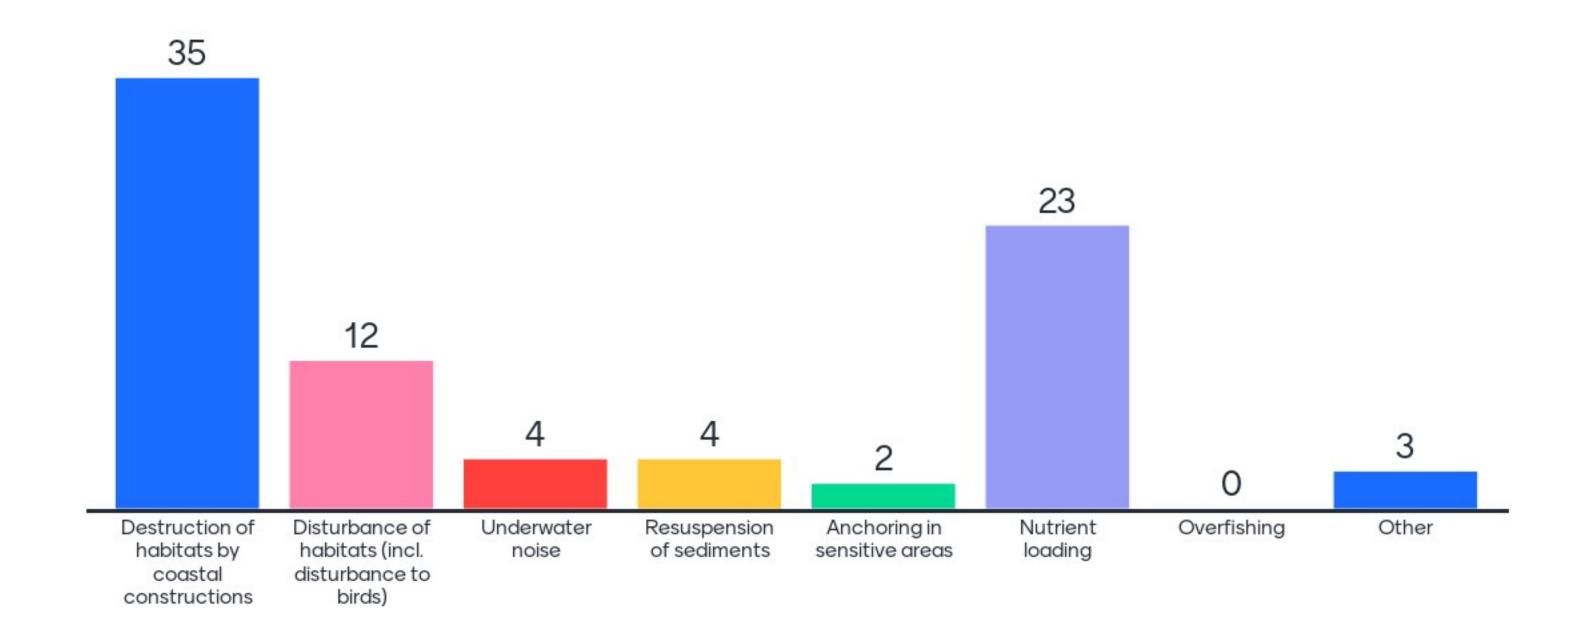

Strongly agree

Restoration of marine environment: In your area, to what type of habitats or species should restoration be focusing on?

The most important pressures created by recreational activities (boating, yachting, summer cottages, leisure fishing etc.) are. Maximum of 2 answers.

Day 2: Sustainable use of marine areas

"teaser" for tomorrow...

Ecosystem services: What is the main benefit of mapping and evaluating ecosystem services in the marine area? Maximum of 2 answers.
