

WELCOME TO FINLAND

DRINKS ARE ON US

Finland has some of the purest natural water resources in the world, available at every faucet around the country — for free. Still, a lot of visitors choose to buy bottled water. We don't know why they do it, but we suspect it's just a habit. But it's an expensive habit and not exactly environmentally friendly. We would like to encourage you to refill your water bottle as you travel, or drink straight from the tap. It's time to start drinking responsibly.
