

*LIFE + Environment Policy and Governance*

**Project name:** Participatory monitoring, forecasting, control and socio-economic impacts of eutrophication and algal blooms in River Basin Districts (GISBLOOM)

**Project reference:** LIFE09 ENV/FI/000569

**Duration:** October 1<sup>st</sup>, 2010 – September 30<sup>th</sup>, 2013

EU LIFE+  
**GisBloom**

## **Deliverable**

**Action 4. Guidance document of applying the demonstrated methods in river basin management planning**

**Beneficiary:** Finnish Environment Institute (SYKE)

**Contributors:** Sari Väisänen, (SYKE)

**Due date of deliverable:** 31.08.2013

**Actual submission date:** 29.08.2013

With the contribution of the LIFE financial instrument of the European Community

## **SUMMARY**

The deliverable of Action 4 is the Guidance document of applying the demonstrated methods in river basin management planning (Mallit avuksi vesienhoidonsuunnitteluun – GisBloom pilottialueilla). It will be published in the SYKE-reports series as an internet publication during September 2013.

The aim of this report is to give summarized descriptions to each of the project's pilot areas about the results in their area and demonstrations on how individual models or tools can be applied in River Basin Management Planning, taking into account special characteristics of each area. It also instructs where more detailed modelling results can be found on Vesinetti map service. There are also user guides for Vesinetti and Järviwiki map services as appendixes of the report.

## Appendix: THE GUIDANCE DOCUMENT 29082013.pdf
